

Form to fill in for quantitative Amino Acid analysis

Samples.....
.....
.....
.....
.....

Approximate concentrations of the samples:

.....
.....

(Minimum amount of sample: 25 µg protein, i.e. it should be possible to pipette up or weigh in 25µg.)

Write down what kind of buffer the samples are dissolved in:

.....
*(Avoid high concentrations of ammonium containing buffers,
Tris, glycerol and high concentrations of NaCl)*

Sequence of peptide/protein:

.....
.....

Does any of the samples contain an un-natural amino acid or Norleucin?

.....

Analysis of Cysteic acid? Y/N
(we need at least 100 µg extra)

Analysis of Tryptophan? Y/N
(we need at least 0,5 mg extra)

Analysis of free amino-acids? Y/N.....

Name.....
Company/Department.....
Address.....
Telephone.....
Fax.....
E-mail.....

Invoice address , Purchase order/Reference code:

.....
.....
