

## AMINO ACID ANALYSIS CENTER

UPPSALA  
UNIVERSITET

### AMINO ACID ANALYSES

Prices valid from 2015-04-01

<b>Analyses:</b>	<b>SEK</b>
- Standard analysis (24h hydrolysis)	3 000:-
- Oxidized sample (oxidation with per formic acid for determination of Cysteic acid and Methionine sulfone). This is performed in addition to a 24h hydrolysis	1 800:-
- Analysis of Tryptophan (hydrolysis with mercaptoethanesulfonic acid). This is performed in addition to a 24h hydrolysis	1 800:-
- Analysis without hydrolysis, test for free amino acids	3 000:-
<b>Additional services:</b>	800:-

This can be either of the following:

- Purity tests (overloads)
- Grinding of the sample
- Removing of protection groups (treatment with piperidine)
- Hydrolysis for 72h (together with 24h hydrolysis)
- An additional service can also involve extra fee for very time consuming samples

### Express service:

We offer our customers express service after agreement. The results will normally be reported within 48h from the time when we received the sample. This is valid only for 24h standard hydrolysis and the price is twice the normal price. Please contact us in advance in case of express service.

For other analyses, please contact us on telephone: 018-471 4562 or 018-471 4210
